Networking and Security Capabilities for the Healthcare Industry

Proficio Overview
Proficio is a leading provider of security and networking solutions. Enterprises benefit from Proficio's knowledge and real world experience in delivering large successful projects and rely on our team for consulting, implementation, and managed services. Proficio works closely with its customers to understand their needs and align solutions to their IT and business strategies. We partner with a select group of technology leaders with whom we share a passion for excellence and provide a framework of solutions that addresses the full spectrum of IT assets and the realities of an always-on, mobile world.

Healthcare Industry Experience
We understand the challenges of maintaining patient confidentiality, meeting compliance mandates, and delivering 24×7 networking services that face healthcare providers.

Proficio is experienced at building new wired and wireless networks and refreshing data center technologies. We understand the expectations for network performance and our engineers are unfazed by requests to upgrade core routing and switching platforms with zero downtime.

Certified on Leading Vendors
Proficio's networking and security engineers are certified and have received advanced training on industry leading products including Check Point, Cisco, Extreme, Fortinet, HP, Imperva, Infoblox, Juniper, Palo Alto Networks, and Qualys. Our team's Cisco certifications cover voice and data ranging from Cisco SMB Engineer to CCIE.

Networking and Security
Proficio provides a comprehensive portfolio of networking and security products and services. We are experienced with switching, routing, wireless, firewalls, IDS/IPS, SIEM, log management, anti-malware, web security, email security, password security, and more. Equally importantly, we understand how these technologies work together and are experienced deploying new applications that affect existing network configurations and security rules.

In addition to technology certifications, our team holds key security certifications, including the following:

CEH	Certified Ethical Hacker
CEPT	Certified Expert Penetration Tester
CISA	Certified Information System Auditor
CISM	Certified Information Security Manager
CISSP	Certified Information Systems Security Professional
CREA	Certified Reverse Engineering Analyst
GCFA	GIAC Certification Forensic Analyst
GCFW	GIAC Certified Firewall Analyst
GCIA	GIAC Certified Intrusion Analyst
GCIH	GIAC Certified Incident Handler
GWAPT	Web Application Penetration Tester

Voice and Data
Modern organizations increasingly benefit from a unified communications infrastructure that helps staff communicate more effectively, reduces costs, and leverages wireless applications.

Proficio is experienced in implementing voice and data solutions including Cisco wireless and VoIP products. We understand the criticality of network design and implementation for successful voice applications and have experience migrating legacy telephony systems to Cisco's Call Manager.
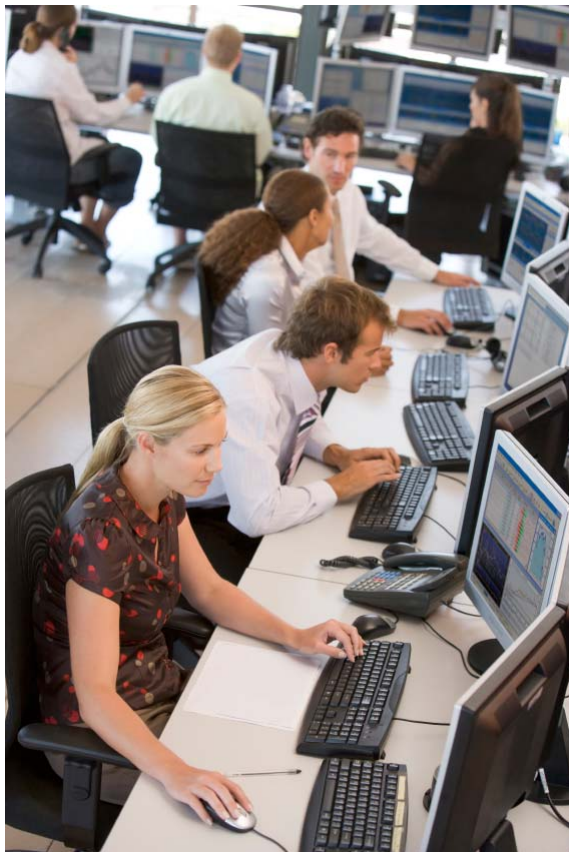

ProNOC
Proficio's ProNOC service monitors thousands of networks and applications and is relied upon by millions of people for everything from healthcare to banking to utilities. We provide 24x7 monitoring of your networks, servers, circuits, and applications ensuring continuous uptime.

In the event of a problem, we act immediately to troubleshoot the issue, notify the appropriate personnel and advise how to respond to a problem or take direct responsibility for remediation. Using our customized NOC monitoring service is like expanding your IT staff without the cost and pain of hiring.

ProSOC
Pro**SOC** is our IT security service that enables organizations to more cost-effectively protect their data and meet compliance mandates. ProSOC security experts use industry leading SIEM technology to monitor, prioritize and respond to security alerts 24×7. Our experts have managed some of the largest and most respected Security Operation Centers in America.

Unlike the majority of vendors who can be good at solving "yesterday's problems," Pro**SOC** analyzes multiple log and event sources through cross-device and functional correlation to proactively find the real threats in a sea of noise.

Proficio provides more SIEM implementation choices than any other managed service provider including SIEM as a Service, Security Monitoring, Managed Security Services, SIEM Implementation, and SIEM Operations and Maintenance.

End-to-End Capabilities
Proficio offers a range of capabilities and services to help organizations move projects from planning through implementation and to product deployment on time and on budget. Our services include:

- Planning
- Gap Analysis
- Compliance and Risk Assessments
- Security and Vulnerability Assessments
- Design
- Project Management
- Training & Testing
- Systems Integration
- Life Cycle Management
- Change Management
- ProSOC & ProNOC
- Support
