

ProSCAN+

CLOUD-BASED IT SECURITY AND COMPLIANCE FOR CREDIT UNIONS AND FINANCIAL INSTITUTIONS

ProSCAN+ was designed with Credit Unions and other financial institutions in mind. ProSCAN+ offers comprehensive FFIEC and NCUA 748 compliance, including monitoring, logging, and scanning in one easy-to-use

BUILT FOR CREDIT UNIONS AND FINANCIAL INSTITUTIONS

Small and mid-size financial institutions have become key targets for criminal hackers, both foreign and domestic. Criminals have become increasingly coordinated, organized and creative in their tactics and in-house security solutions are often difficult to use and less cost-effective. Several options exist to outsource components of an information security program, however, purchasing these individual components separately is less-effective than an all-in-one solution, more costly, labor-intensive, and complex. ProSCAN+ from Proficio has combined the services and features financial institutions need to remain protected and compliant in one streamlined, affordable, all-inclusive package for a fraction of the price of some leading competitors.

ProSCAN+ is an easy-to-use, cloud-based service that provides financial institutions with the specific Risk Assessment tools and Active Monitoring required to safeguard your members, your assets, and your reputation. ProSCAN+ offers financial institutions the most advanced technology to monitor and scan their critical assets without adding headcount or costly software or hardware systems. ProSCAN+ combines Proficio's ProSOC service for Security Information Event Management (SIEM) and Log Retention with Qualys's integrated suite of Vulnerability Management, Web Application Scanning, PCI and Policy Compliance capabilities.

CREDIT UNION REGULATORY COMPLIANCE

Proficio provides comprehensive compliance reporting that makes it easy for you to map regulations to controls. These streamlined reports and provide the evidence you need to execute those controls. Furthermore, ProSCAN+ uses advanced security metrics to map GLBA, FFIEC and NCUA controls with real information about when security reports were reviewed.

KEY BENEFITS

- Logging, monitoring and scanning in one service
- Identify vulnerabilities before they can be exploited
- Real-time security monitoring and prioritized alerts 24x7
- Scan and discover web application vulnerabilities
- Meet PCI and other compliance requirements
- Increase productivity and streamline reporting
- Eliminate CAPEX and reduce recruiting and admin costs
- Configuration audit to Policy

PROACTIVE PROTECTION

The window of opportunity for financial institutions to effectively respond to an attack is becoming increasingly small and requires prompt and direct action. Proficio's expert security analysts have proven their ability to use advanced event correlation to successfully detect attacks in progress and help clients develop a comprehensive solution to proactively and continuously protect their data and IT assets against security threats.

MAKING PCI COMPLIANCE EASY

ProSCAN PCI Compliance enables merchants and Member Service Providers to promptly complete a PCI ASV Scan. ProSCAN PCI Compliance includes a self-assessment questionnaire and enables users to conduct network and web application security scans to efficiently identify and eliminate security vulnerabilities. The “auto submission” feature completes the compliance process, allowing users to submit compliance status to one or multiple acquiring banks. The ProSCAN+ service also meets the PCI requirement to retain full logs for 12 months and review event logs daily.

MEET MULTIPLE REGULATORY INITIATIVES

ProSCAN Policy Compliance allows users to create user-defined policies using an extensive library of technologies and controls, including multiple well-known frameworks and regulations. The library includes:

- **Technologies:** AIX 5.x, HP-UX 11.x, Linux Red Hat 3, 4, 5 Oracle 9i, 10g & 11g, Solaris 9.x, Win 2003 Server and Win XP desktop
- **Frameworks:** COBIT 4.0, ISO 17799, and NIST SP800-53
- **Benchmarks:** CIS
- **Compliance:** SOX 404, GLBA, HIPAA, and Basel II

POWERFUL SIEM AND LOG MANAGEMENT

ProSCAN+ uses an advanced Security Information and Event Management (SIEM) and Log Management platform with the most advanced correlation engine in the industry. We analyze multiple log and event sources using cross-device and functional correlation to proactively find the real threats in a sea of noise. Our powerful SIEM platform thwarts the most complex security attacks and provides instant notification of priority security alerts that

ProSOC Security Operations Center as a Service monitors, analyzes and addresses your organization's security events with:

- Affordable 24x7x365 monitoring and analysis
- Advanced detection algorithms to ID the real threats
- Immediate alerting of critical security incidents
- Next-Gen protection against perimeter & insider threats

Scanning Powered by QualysGuard Ensures your organization is constantly in compliance so you never have to worry about regulatory penalties for non-compliance, or the ensuing brand damage, loss of trust and potential lawsuits. ProSCAN+ provides compliance reporting and log retention for a wide range of regulations including NCUA, FFEIC, PCI, FIBL, DSS, HIPAA, and SOX.

Instant Alerts on critical threats allow us and our clients to respond to an attack before it's too late. Proficio has refined the complex automated correlation metrics that allow us to proactively identify and derail an attack in progress. Unlike many of our competitors who offer only static correlation, ProSCAN+ utilizes advanced cross-correlation analysis tailored specifically for the financial services industry.

ProSCAN+ Competitive Comparison

	ProSCAN+	Conventional Approach
Cloud-Based Deployment	✓	On-Site
OPEX Fee Model	✓	CAPEX
Zero Systems Administration	✓	Complex
Automated Scanning	✓	Manual
Prioritized Real-Time Alerts	✓	High level of False Positives
Advanced Correlation Analysis	✓	Static Correlation
Web Application Scanning	✓	External Vendor
SIEM for Investigation /Analysis	✓	Not Included
1-Year Full Log Retention	✓	High Additional Cost
Configuration Auditing	✓	High Additional Cost
PCI ASV Scan	✓	High Additional Cost
