

# ProSOC for Credit Unions and Financial Institutions

## Overview:

ProSOC is a next-generation Security Operations Center (SOC)-as-a-Service designed to meet the security and compliance challenges facing modern enterprises. ProSOC provides 24x7 security monitoring using advanced SIEM technologies and Proactive Threat Defense.

## Key Advantages:

- Affordable 24x7 expert security event monitoring
- Next-generation Proactive Threat Defense identifies the early stages of attacks and suspicious insider behavior before breaches result in loss of data
- Provides actionable intelligence that enables internal IT teams to effectively and quickly resolve issues
- Meets compliance requirements including, PCI, SOX, GLBA, NCUA, FFIEC, and others
- Provides full visibility to event logs with easy-to-use web portal, powerful reporting, dashboards, and drill down analytics
- Scalable cloud-based deployment - no software or hardware purchases
- Out-of-the-box support for 350+ log sources
- Flexible service model: SOC-as-a-Service, SIEM-as-a-Service, and hybrid on-premise options
- Off-loads IT teams from configuring, tuning, and patching firewalls, NGFWs, IDS/IPS, and WAFs

Small and mid-sized financial institutions are exposed to a wide range of security and compliance threats and have increasingly become targets for cyber criminals, both foreign and domestic. Identity theft is growing rapidly as hackers target credit card, personal identity documents, and other confidential data. Inappropriate or malicious actions by employees or partners leading to data breaches are further causes for concern.

In this threat landscape, financial organizations need the strongest levels of security, but often lack the budget and in-house expertise to meet their desired goals. Proficio's ProSOC is designed to meet the most demanding security and compliance challenges with next-generation technology and around the clock monitoring and support by security experts.

## Security Experts Working for You

Proficio's team of Security Engineers and SOC Analysts are working 24x7 to support our customers. We are constantly tuning correlation rules and use cases, investigating suspicious events, and recommending appropriate action to prevent problems or resolve issues. Proficio services are delivered through our Security Operations Centers (SOCs) and supported 24x7 by our team of security experts.

We have managed some of the largest and most respected Security Operations Centers in America and internationally. Proficio off-loads specialized and time consuming tasks from customers, including SIEM administration, log monitoring, compliance reporting, and patching and configuring firewalls, NGFWs, IDS/IPS, and WAFs. In an environment where it is increasingly difficult to recruit and retain qualified specialists, our ProSOC service is highly cost effective and allows in-house IT personnel to focus on other priorities.

## Proactive Threat Defense

Despite the best efforts of IT teams, damaging security breaches occur far too regularly. The threat landscape is increasingly complex and hackers are exploiting vulnerabilities across people, processes and technologies. Unlike the visible incursions of the past, new attacks employ slow and low strategies. Attackers are often able to systematically pinpoint security weaknesses and then cover all traces of their presence as they move on to penetrate the other critical IT assets. Employees, contractors, and other insiders are increasingly a source of data breaches.

Proficio's ProSOC uses next-generation Proactive Threat Defense techniques to identify the early stages of attacks and suspicious insider behavior before breaches result in loss of data. Multi-vector event correlation techniques, asset modeling, user profiling, and threat intelligence are among the advanced technologies used to identify threats and help prevent security exploits. Examples of events that can be analyzed include:

- Suspicious login attempts by a user into a database outside their department
- Database access from known malicious IPs
- After-hours access by a systems administrator
- Email with unencrypted confidential data
- Web surfing to sites that indicate job search behavior
- User ID changes or attempts to mask user identity
- USB files saved
- Suspicious VPN activity

## We Take the Pain Out of SIEM

ProSOC customers benefit from using the most advanced SIEM technology to log and correlate security events without the cost and complexity of owning and administering a SIEM system. The ability to accurately prioritize security alerts is critical to enabling an effective and rapid response.

As industry insiders know, the art and science of administering a SIEM application is non-trivial. The experts behind ProSOC are exceptionally skilled in configuring SIEM systems and customizing correlation rules and use cases to identify critical security alerts that are most relevant to each of our customers. ProSOC is a subscription service that seamlessly scales to meet your growth needs. You never need to worry about hiring, performance tuning, or capacity management – that's our job.

## Full Visibility and Access to Security Logs

The ProSOC Web Portal provides customers with a real-time summary of the state of their security and includes:

- Operational Dashboards
- Reports for security, management, and compliance
- Full access to security event logs
- Active Channels
- Drill down analytics
- Role-based and user-based views
- Case Management

## Cloud, On-Premise, Hybrid

Proficio understands that each of our customers has unique needs and goals. Our ProSOC service is the most flexible in the industry and can address most deployment models and service permutations customers require.

For example, some organizations prefer to outsource all aspects of SIEM administration, event logging, and 24x7 expert monitoring. Others prefer a hybrid model where we provide a fully managed cloud-based SIEM service and they monitor and remediate their own security events. Still others wish to maintain their own on-premise SIEM system, but are looking for our help to either remotely administer their SIEM or monitor alerts outside normal business hours.

## About Proficio

Proficio is a leading Managed Security Service Provider (MSSP). We are changing the way organizations meet their IT security and compliance goals by providing the most advanced cloud-based solutions to monitor and scan critical assets without the need for added headcount or costly software or hardware systems. Our customers value our insight, experience and unrelenting passion for defending their networks and applications from cyber attacks.

## Assured Compliance

ProSOC fully addresses compliance requirements for PCI, SOX, GLBA, NCUA, FFIEC, and others.

- Collection and correlation of security logs
- 24x7 Security Analyst monitoring and support
- Retention of logs, investigations, case histories, and audit reports
- Forensic Investigation
- Dashboards for quick identification of potential security and privacy breaches
- Separation of Duties

## Future Ready

ProSOC is a next-generation managed security service designed to address the changing threat landscape. ProSOC monitors and protects data and applications stored in cloud infrastructures, like AWS, using virtual relays and cloud-based IDS software. ProSOC helps address issues arising from BYOD and the deployment of wireless applications by monitoring mobile device users and applications for unauthorized or suspicious behavior.
